

NARASIMHA REDDY

B.Tech (AI & Data Science) | Fresher

Phone: +91-9573686232 Email: chennupallihari99@gmail.com Location: Kadapa, Andhra Pradesh 516003

GitHub: <https://github.com/Harilol>

PROFESSIONAL SUMMARY

Motivated AI and Data Science student with practical experience building machine learning models using Python and Scikit-learn. Strong foundation in the end to end ML workflow including data preprocessing, feature engineering, model training and evaluation. Experienced in applying supervised learning techniques to real world datasets. Seeking an entry level role to apply data driven skills in a collaborative environment.

TECHNICAL SKILLS

Programming:	Python, SQL
ML Libraries:	Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
Machine Learning:	Supervised and Unsupervised Learning, Classification, Regression, Model Evaluation, Feature Engineering, Hyperparameter Tuning
Tools:	Git, GitHub, Jupyter Notebook, Google Colab
Concepts:	EDA, Data Preprocessing, Cross Validation, Data Visualization

EDUCATION

B.Tech in Artificial Intelligence and Data Science	2022 - 2026
Kandula Obul Reddy Memorial College of Engineering, Kadapa	
Intermediate (MPC)	2020 - 2022 Percentage: 56%
Sri Chaitanya Junior College	
Secondary School Certificate (SSC)	2020 Percentage: 75%
Rayalseema English Medium School	

INTERNSHIP EXPERIENCE

Smart Bridge (APSCHE)

AI and ML Intern (Virtual)

- Learned fundamentals of Artificial Intelligence and Machine Learning including data preprocessing, model building and basic algorithms.
- Worked with Python, NumPy and Pandas to analyze data and build simple machine learning models.
- Gained understanding of real world ML applications and improved analytical and problem solving skills.

Skill Dzure (APSCHE)

Data Science Intern (Virtual)

- Completed training in Data Science concepts covering data cleaning, exploratory data analysis and model building.
- Applied statistical and analytical techniques on real world datasets to extract meaningful insights.
- Gained hands on exposure to the end to end data science workflow from data collection through to model evaluation.

PROJECTS

Customer Churn Prediction

Built a classification model to predict customer churn and identify key factors driving attrition. Applied feature engineering and handled class imbalance to improve reliability. Evaluated using accuracy, precision, recall, F1 score and confusion matrix.

Diabetes Prediction

Developed a classification model to predict diabetes onset based on patient health indicators. Performed EDA and preprocessing including handling missing values and feature scaling. Compared multiple models and selected the best performer based on accuracy and recall.

House Price Prediction

Built a regression pipeline to predict housing prices using real world datasets. Improved R^2 score from 0.57 to 0.66 through feature engineering and model tuning. Evaluated using MSE and R^2 metrics and visualized results with Seaborn.
